GENERAL PRODUCT INFORMATION

The Sealing caps (plastic) are used to close female threads. They can be used for all sizes of the Threaded anchor system regardless of whether a Recess former is used or the thread is installed flush to the surface. Therefore, the penetration of dirt is not possible using the Sealing caps. A permanent corrosion protection is only partially given as a penetration of water into the sealed socket cannot be excluded.

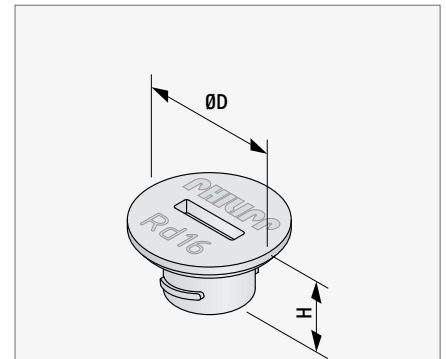

NO COMBINATION WITH MARKING RINGS

The Sealing cap (plastic) (72KAS_) cannot be combined with Marking rings at all (picture 4).
